GREENSPIRATION: GENK'S NATURAL CAPITAL AS A DRIVER FOR SUSTAINABLE VALUE CREATION

Tuesday, 9 June 2015 from 17:30 to 20:30 at the C-mine crib

Genk is the greenest city of Flanders, a young and vibrant city colored by the diversity that went hand-in-hand with its rich mining history. Confronted with the challenges of economic downturn, the city is at the forefront of exploring new economic models based upon new notions such as a circular economy, an entrepreneurial city, smart development and cleantech innovation. In this open dialogue session, we would like to explore with you the following:

- how the city can harness nature's value benefitting all forms of (social, natural and economic) capital;
- how Genk's natural capital can accelerate smart and inclusive innovation;
- how Genk's natural capital can be of value and generate value to create a prosperous resilient city.
