List of Hacker Spaces

This is a comprehensive, user-maintained list of all active hackerspaces throughout the world.

We have also a list of planned hacker spaces, as well as a list of all hackerspaces around the globe - including those still in building process - or already closed. Realtime data of some active hackerspaces is available at the [SpaceAR#](#) project.

This page is cached due to its long rendering time. If you want to flush the cache, [Click here!](#)

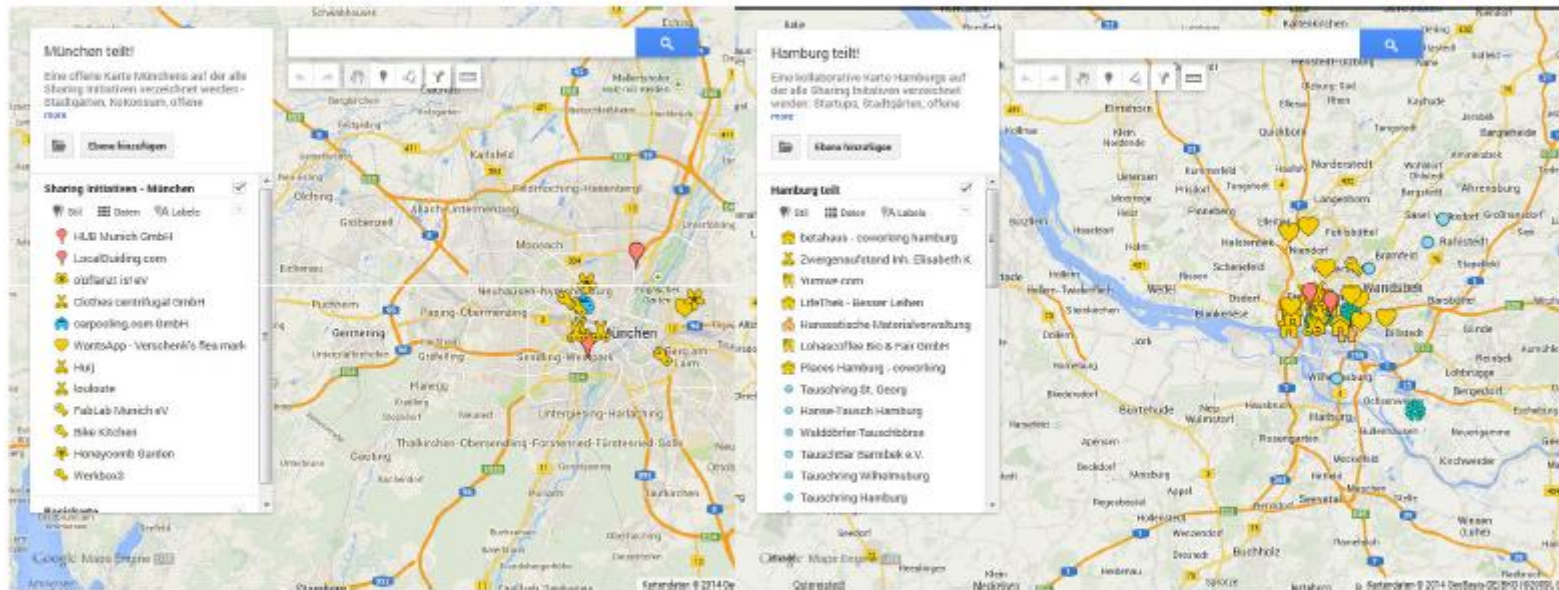

Food and gardening

The collage features several digital elements:

- STADTacker.net**: A website interface for urban agriculture, showing a map of Europe with various colored markers (green, yellow, red) indicating different types of urban farming projects. A sidebar lists categories like 'Rusticaux', 'Cultivables', 'Nuisa', 'Oubliés', 'Frais', and 'Mise à jour'. Below the map is a detailed view of a specific location with a satellite image and a list of nearby urban farming sites.
- Guérilla gardening France**: A website interface for guerrilla gardening in France. It features a navigation menu with 'ACCUEIL', 'RAPPORTS', 'SOUMETTRE UN ÉVÉNEMENT', 'RECEVOIR DES MISES À JOUR', and 'CONTACTEZ-NOUS'. The main content area includes a text block about a map of guerrilla gardening sites and a sidebar with a 'TOUTES CATEGORIES' button and a list of categories: 'REPÉRAGES' (blue) and 'ACTIONS' (green).
- Botanischer Sondergarten Wandbek**: A website interface for a botanical garden in Hamburg, featuring a map and text about the garden's management and location.
- Deutsches Garten**: A map of Germany with various colored markers indicating different types of urban gardening projects.

Many many maps

→ Many themes

→ Dispersed accross the web

https://docs.google.com/spreadsheets/d/1gyggHDoEj-w8LEdcPBs_J1FMtOf0GHFzZcHPtAQMorl/edit#gid=0

Many many maps

- Many themes
- Dispersed accross the web
 - Fragmented
 - Not up-to-date

Social dilemma

- How to aggregate maps accross taxonomies, platforms, licenses and keep data up to date?
- How to organize such a process collectively?

TransforMap

- Technical

- Use and work in the existing: Open Street Map tools (open source, open data, big community)

<http://transformap.co/#12/47.0591/15.4126>

- Develop common taxonomy through a wiki:

<https://wiki.openstreetmap.org/wiki/User:KartenKars ten/futureMap>

- Adapt the existing: open source editor
- Research connectivity of maps, setup database(s)
- Set up map portal

TransforMap (...)

- Social process
 - Build the community: live meetings, online collaboration: eg. taxonomy
 - Build the movement (partnerships, maj jams, mapathon, etc.)
- Meta:
 - Setup a communication & governance infrastructure: discussion tools, wiki, blog, twitter, etc.

Linked data

- The semantic web
 - “**linked data** describes a method of publishing structured data so that it can be interlinked and become more useful. It comprises a set of Web technologies to share information in a way that can be read automatically by computers. This enables data from different sources to be connected and queried.”
 - Eg. REEGLE platform
 - Enabling serendipity (‘pleasant surprise’)

Impact?

User stories

- **Activist/participant**
 - Network, visibility, identity
- **Local policy maker**
 - Understanding, stakeholder identification
- **Standard citizen**
 - Become aware, find alternatives, engage,
- **Researcher**
 - Crowdsourc data on social innovation, collaborate

Thank you!
